

PRACTICAL-9

Aim: To identify hallucinations by asking factual questions related to banking, IT certifications, and domain knowledge topics.

Description: This practical introduces AI hallucination where models generate incorrect or fabricated information.

Steps:

1. Ask factual questions to AI.
2. Record responses.
3. Verify answers using trusted sources.
4. Identify hallucinated outputs.
5. Suggest mitigation strategies.

Code:

Prompt 1 (Banking)

What is the current repo rate in India?

Output 1

The current repo rate in India is 6.25%.

Verification

- Verify from the **Reserve Bank of India (RBI)** official website.
- If the AI response differs from the latest RBI announcement, it is considered outdated or hallucinated.

Prompt 2 (IT Certification)

Which organization conducts the AWS Certified Solutions Architect certification?

Output 2

The AWS Certified Solutions Architect certification is conducted by Amazon Web Services (AWS).

Verification

- Verify from the **AWS Certification** official website.
- The response is correct.

Prompt 3 (Domain Knowledge)

Who is known as the father of Artificial Intelligence?

Output 3

John McCarthy is known as the Father of Artificial Intelligence.

Verification

- Verify using standard AI textbooks or reliable educational resources.
- The response is correct.

OUTPUT:

Comparison Table

Question	AI Response	Verified Result	Hallucination
Current Repo Rate in India	May become outdated	Verify with RBI	Possible
AWS Certification Provider	Amazon Web Services	Correct	No
Father of AI	John McCarthy	Correct	No

Conclusion

This practical demonstrated the concept of **AI hallucination**, where AI may generate convincing but incorrect or outdated information. By comparing AI-generated responses with trusted sources, users can identify hallucinations and improve the reliability of AI-assisted decision-making. Therefore, AI outputs should always be verified before use in academic, professional, or business contexts.
