

PRACTICAL-4

Aim: To develop constrained prompts for social media content creation (word limit, tone, platform-specific format).

Description: This practical demonstrates how constraints such as word limits, tone, and platform-specific requirements affect AI-generated social media content.

Steps:

1. Open a Generative AI tool.
2. Select a social media platform.
3. Define word limit and tone.
4. Create constrained prompts.
5. Generate and compare outputs.

Code:

Prompt 1 (General Prompt)

Write a social media post promoting a new fitness smartwatch.

Output 1

Stay active and connected with our new Fitness Smartwatch! Track your steps, monitor your heart rate, receive notifications, and achieve your fitness goals with style. Get yours today and take your health to the next level!

Prompt 2 (Constrained Prompt)

Write an Instagram post promoting a new fitness smartwatch.

Constraints:

- Maximum 50 words
- Friendly and motivational tone
- Include exactly 3 hashtags
- Add one relevant emoji
- End with a call-to-action.

**SILVER OAK
UNIVERSITY**
EDUCATION TO INNOVATION

Output 2

🕒 Crush your fitness goals with our new Smartwatch! Track every step, monitor your heart rate, and stay motivated every day. Your healthier lifestyle starts now. Order yours today! #Fitness #Smartwatch #HealthyLife

OUTPUT:

Comparison

Criteria	General Prompt	Constrained Prompt
Platform Specific	No	Yes (Instagram)
Word Limit	No	Yes (50 words)
Tone	General	Friendly & Motivational
Emoji	No	Yes
Hashtags	No	Exactly 3
Call-to-Action	Basic	Clear and Effective
Engagement	Moderate	High

Conclusion

The constrained prompt generated content that was concise, platform-specific, engaging, and followed all the specified requirements. Applying constraints such as word limit, tone, hashtags, emojis, and call-to-action significantly improves the relevance and effectiveness of AI-generated social media content.
