

PRACTICAL-6

Aim: To test AI responses for student query handling systems using ambiguous vs clear academic questions.

Description: This practical demonstrates how ambiguous and clear academic questions influence the quality and relevance of AI-generated responses.

Steps:

1. Open a Generative AI tool.
2. Prepare ambiguous and clear academic questions.
3. Submit questions to AI.
4. Compare the responses.
5. Analyze the output quality.

Code:

Prompt 1 (Ambiguous Prompt)

Explain AI.

Output 1

Artificial Intelligence (AI) is the simulation of human intelligence by machines. AI enables computers to perform tasks such as learning, reasoning, problem-solving, and decision-making.

Prompt 2 (Clear Prompt)

Explain Artificial Intelligence in simple language for a first-year BCA student. Include its definition, types, real-world applications, advantages, disadvantages, and provide two examples in about 300 words.

Output 2

Artificial Intelligence (AI) is a branch of computer science that enables machines to perform tasks that normally require human intelligence, such as learning, reasoning, problem-solving, and decision-making.

**SILVER OAK
UNIVERSITY**
EDUCATION TO INNOVATION

Types of AI:

1. Narrow AI – Designed for specific tasks such as voice assistants.
2. General AI – A theoretical AI capable of performing any intellectual task similar to humans.

Applications:

- Healthcare
- Education
- Banking
- Transportation
- E-commerce

Advantages:

- Saves time
- Improves accuracy
- Automates repetitive tasks
- Provides better decision support

Disadvantages:

- High development cost
- Job displacement
- Privacy concerns
- Bias in AI models

Examples:

1. ChatGPT for answering questions.
2. Google Maps for route optimization.

AI is transforming many industries and improving productivity, making it an essential technology for the future.

UNIVERSITY**
EDUCATION TO INNOVATION

OUTPUT:

Comparison of Responses

Feature	Ambiguous Question	Clear Question
Context	Very Low	High
Detail Level	Basic	Comprehensive
Accuracy	Moderate	High
Relevance	General	Specific
Examples	No	Yes
Structure	Simple	Well Organized
Overall Quality	Fair	Excellent

Conclusion

This practical demonstrated that **iterative prompting** significantly improves the quality of AI-generated business emails. By refining the prompt step by step, the emails became more professional, clear, well-structured, and contextually appropriate. The activity highlights the importance of providing specific instructions to AI in order to achieve accurate, effective, and high-quality communication for business and professional purposes.
